Dr. Li Shu Pui Professional Education Centre, 2/F.,
Chinese Club Building,
21-22 Connaught Road, Hong Kong

Keynote Speech

Teaching Medical Students in Family Practice: The one-minute preceptor and other tools

Professor Martin Dawes, HKCFP Visiting Professor
MB.BS, MD., FRCGP,
Professor, Department of Family Practice
The University of British Columbia

Professor Martin Dawes began his career in the UK, studying for his MB.BS at the London Hospital in 1978. He completed a primary care-focused postgraduate education in Bath in 1983 and then moved to Oxford where he spent the next 17 years in an office-based practice providing primary care and obstetric intra-partum care. In 1992, he completed his PhD based on studies of the effects of weight gain in pregnancy. He was recruited to be head of Family Practice at McGill and in 2010 was recruited to the same position at UBC.

Professor Dawes' current research interests include information retrieval, hypertension, and pharmacogenomics in primary care. He is an active participant with several funded research projects including a national Pharmacogenetics study.

In addition to his research and practice interests, Professor Dawes has considerable expertise and passion for the development of training programs that allow clinicians to engage in Masters level research.
